

# How safe is safe enough?

Consider the challenge of protecting plasma products from infectious agents that you don't even know exist. At ZLB, we face this challenge by staying one step ahead. By learning from the past and focusing on the future. And by always remembering there is no higher purpose than protecting your patients. That's why we're adding a new safety step. **Nanofiltration** from ZLB. The **new frontier** in safety.
